

The Red Stags of Red Deer

A Historical LARP (Live Action Role Play) Group that uses high impact foam weapons with real armour. We are a unique blend of medieval re-enactors and LARPer's (which are more commonly known for their use of magic and mythical creatures which we do not use).

The Red Stags is a medieval recreation hobby group that focuses on the historical time period from about 500 to 1400 A.D.. The Red Stags is interested in enjoying the flavor of this era, so activities cover a diverse range of cultural and artistic interests and are planned for the enjoyment, entertainment, as well as the education, of participants and spectators.

The fellowship involves a community of members in a fun, adventurous role-playing set of exercises to simulate chivalry, honor, combat and status as is typical of the medieval period. These games and mock battles are played out in a public area for all participants and onlookers to enjoy.
